RE: Nutrient Offset Plan Report: Revised

Dear Mr. Davis

This letter serves as the eighteenth installment of the Pinnacle Foods Group LLC Nutrient Offset Plan Report. As required by Special Condition #7 of Pinnacle's NPDES Permit DE 0000736, "The permittee shall submit progress reports every six months outlining actions taken toward implementing this plan".

Spray irrigation operations began on May 1, 2009 and came to a close on October 29, 2009. Over 20.5 million gallons were sprayed on the Reed Canary/Orchard grass site. The field was cut two times in 2009, once each in June and December. The June cuttings yielded a total of 71 bales. The December cutting produced 39 bales, for a total of 110 bales.

The net lbs. of Nitrogen and Phosphorous removed were 8869 lbs. Nitrogen and 2029 lbs. Phosphorous after fertilizer was added.

Should you have any questions please call me at 302-934-3833.

Sincerely,

A handwritten signature in black ink that reads "R. Spence".

Randy Spence  
Plant Manager
